Yuldashev Shahriyor

Software engineer

Tashkent, Uzbekistan
yuldshah.com
t.me/yuldshah
github.com/YuldShah

— Software engineer who owns products end to end: takes ideas to real users fast, then iterates on every detail until it feels right.

— Built and runs SAT Elbek's whole software stack, from the paid course platform to a self-grading homework system: 80,000+ submissions graded for 3,500+ students.

— Freelancing and building own products since leaving Flott, an invoice-factoring startup, on 31 October 2026. Software engineering student at New Uzbekistan University; top 24 in Uzbekistan's IOI national selection, twice.

Experience

Independent · Tashkent — Nov 2026 — present
Freelancing with clients and building my own products

SAT Elbek · Online SAT school, Uzbekistan — Jan 2025 — present
Build and run the school's software

— Build and run the school's stack: course platform, free practice app, homework system, CRM.

— Book pipeline produced a 352-page SAT book with 1,600+ questions, now at the publisher.

Flott · Tashkent — Jun 2026 — Oct 2026
Software and AI engineer

New Uzbekistan University · Tashkent — Mar 2025 — Jun 2026
Student affairs office, alongside my degree

Selected projects

Exponential — Jun — Oct 2026
Built and ran a team issue tracker with meeting transcription, reviewable task suggestions and cited AI activity recaps.

Call analysis CRM — Aug — Oct 2026
Client work: took a sales CRM to multi-tenant SaaS and built call analysis with evidence-backed scoring, coaching and automatic tasks.

Education

New Uzbekistan University — 2024 — present
BSc Software Engineering

Presidential School — 2021 — 2024
Where I found out I was good at computer science

Honours

— IOI national selection olympiad, Uzbekistan: top 24 in 2023 and 2024

— ICPC regionals in Astana and Almaty, team “pick any”

Skills

Product	Specs and prioritisation, metrics from production data, shipping in small steps, killing what doesn't work
Stack	TypeScript, C++, Next.js, React, PostgreSQL, Python (aiogram, FastAPI), Telegram bots and Mini Apps, LaTeX
Languages	Uzbek (native), English (fluent)

Every number above was counted on 10 Nov 2026 from production databases, git and logs. Sources for each are on yuldshah.com.
